ABOUT US

XMLdation deliver Testing as a Service solutions in cloud for banks and payment system operators.

WHY XMLDATION?

With our cloud solution, your customers can work on file testing in parallel with KYC and other onboarding activities.

Customer Testimonials

Treasury Consultant

I have been working with financial institutions and electronic file transfers for the longest time and have never received such an amazing tool for validating, cuts down the development time big time!

Bank Implementation Manager

Client implementation time went from an average lead time of 8 weeks to 8 days.

Senior Product Manager

Real-world testing without any interaction with our support organisation saves us a lot of time and money, not to speak of the productivity gain for our customers.
