

Simo[®]

Simulator for PSO
(Payment System Operator)

ISO 20022

REDUCED RISK

FASTER GO-LIVE

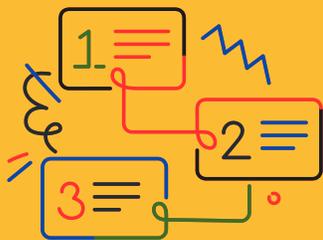

Participant testing

Fast^{er}, easier go-live with reduced effort for payment system operator. Participants test in self-service fashion independently of other participants.

About us

XMLdation deliver Testing as a Service solutions in cloud for banks and payment system operators.

Payment Infrastructure Testing

End to end testing for complex ISO 20022 messaging. Test automation ensures ongoing quality assurance and support for changes throughout the payment system lifecycle.

Why XMLdation?

We are international payments experts with experience across four continents. Our agile team implements requirements with high quality, utilizing cloud-native solutions.

Simplified Payments Testing

Simo[®]'s user-friendly interface and pre-built tools make complex message testing easier, saving testers and engineers time and effort.
